

wialon

Multifunctional solution for GPS fleet tracking

Fleet management

Wialon is a telematics and IoT platform for optimizing vehicle monitoring and fleet operations.

- ✓ The solution is effective for every type of fleets
- ✓ Users can take advantage of the web and mobile app
- ✓ It's suitable for businesses of all sizes

Control your fleet
in real-time

Reduce
downtime

Increase the safety
of vehicles and
transported goods

Monitor driving
behavior

Cut fuel and
vehicle
repair costs

Improve the quality
of transportation
services

WIALON FUNCTIONALITY

A wide range of features will allow you to track any parameter and control the fleet from A to Z:

GPS monitoring in real-time

Geofences for tracking units and events within a specific area

Fuel consumption control

Driving behavior control

Video monitoring

Maintenance management

Tachograph data analysis

Prevention of the vehicle and fuel theft

Tracker and CAN bus data analysis

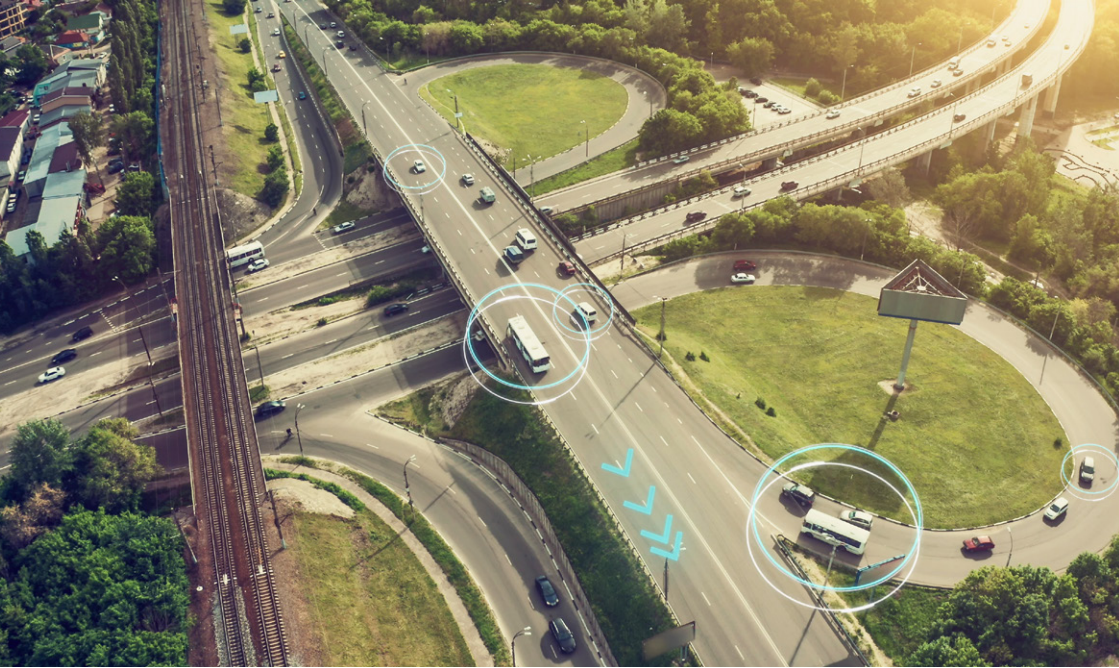

Monitoring of cargo transportation conditions

BENEFITS FOR YOUR BUSINESS

20 or 1,000 cars? Trucks, vans, taxis, buses? Volvo, Renault, MAN, or Mercedes?

It doesn't matter what vehicles you use and how many. Wialon will help you take any fleet under control.

Fast payback thanks to reducing fuel costs, repairs, and fines

Access to reliable fleet data for making effective business decisions

Fleet is protected from the vehicle and fuel theft, hijacking, and illegal trips

Flexible reports with customizable parameters

Effortless integration with systems already in use

Notifications to respond to emergencies immediately
